

BRZ™ Algae Eater

Ponds, Pools, Fountains, Aquariums, Stock Tanks, Fish Farms

100% Clinoptilolite mineral

- Helps remove algae by adsorbing nitrogen out of the water, eliminating their source of nourishment
- Durable PVC mesh bag with metal grommet
- Reusable:
BRZ™ Algae Eater can be regenerated by washing off the algae and soaking the Algae Eater in a 3% salt solution (5 tablespoons of salt per quart of water) for one hour and rinse with fresh water.

People and Pet Safe

- NON-TOXIC
- Non-carcinogenic
- A natural mineral that won't irritate or burn

Algae Eater can also be used to control moisture

- Hang in areas where moisture is a problem

BRZ™ Algae Eater absorbs up to 55% of its weight in water like a sponge, turning it dark green.

Packaging	32 oz/0.907 kg PVC Mesh Bag
Particle Size	-1/2" + 1/4"

Put one bag per 30 gallons of water in your water feature, pond, fish pond, stock tank or any other place with an algae problem.

Environmentally friendly 100% Natural Clinoptilolite

No heavy metals or water soluble salt

California Proposition 65 compliant: no crystalline silica

GRAS Listed (Generally Regarded as Safe): CFR Title 21, Sec. 182.2729
